**Looking at Future Federal Design
and Construction Challenges: An
Engineering Firm's Perspective**

Michael G. Pavlides, CFM
Vice President
Federal Programs Office (FPO),
PBS&J

PBS&J is a major national, employee-owned firm that provides infrastructure planning, engineering, construction management, and program management services to a wide variety of customers. In FY06, Pavlides' office guided Federal Government sales for PBS&J of \$75M with a contract value of over \$ 1.5 billion.

Mr. Pavlides has 30+ years of civil engineering experience, program and project management, and implementation of advanced technology systems and has served on infrastructure asset management project panels for the National Academy of Science (NAS), Transportation Research Board (TRB). He has lectured nationally on GIS, was the first President of ASFPM Foundation, and is the current President of the Washington DC Post of the Society of American Military Engineers (SAME). His career has included work in water and wastewater engineering, coastal and water resource engineering, emergency management, geographic information systems, and information technology.
